

PROTECTION YOU CAN COUNT ON

For more than 30 years, CoastTec has been setting the industry standard for reconditioning and repairing single-phase Uninterruptible Power Supplies (UPS). As the only APC Certified out-of-warranty service center in the United States, our core business is focused on reuse, remanufacturing to component level and certified pre-owned sales. All of this work is performed in the USA by our own team of engineers and APC Certified Repair Technicians in our full-service production facility.

Beyond the reassurance you receive from our 30-Step Recertification Process, each Factory Recertified UPS put into service will carry a Full Two-Year Warranty. The warranty begins on the date of replacement of each unit, giving you the same confidence and protection as the first day you purchased your UPS.

FAST AND EASY COASTTEC SOLUTIONS

Advanced-Exchange

We can ship you an APC Factory Recertified UPS unit to replace a failed UPS within 3-4 business days of placing your order. When your new unit arrives, place your old UPS unit in the box your replacement arrived in and send it back to us. It's that simple!

Repair & Return

CoastTec can service your original UPS unit. Packing materials and a shipping label will be sent directly to you to ship your unit in for repair. When your unit arrives at our facility, we will completely recondition and recertify the unit, and ship it back to you within 3-5 business days from the time we receive it.

Buy UPS (No Exchange)

Purchase an APC Factory Recertified UPS from CoastTec directly and save money. Choose from a large selection of current and legacy UPS models.

Batteries Only

You can purchase brand new APC RBC (Replacement Battery Cartridge) kits. ALL batteries CoastTec uses are brand new and APC approved batteries.

Expedited Service and Shipping

Transit times vary between 1-5 business days. Need it faster? Ask about rush service and overnight shipping.

Managing a Large Fleet?

Ask about our Comprehensive Protection Plan® for the easiest, most cost-effective way to manage your APC UPS fleet.
